PDF Converter Professional 6

Create, Convert, Edit and Share – Better PDF for Business™

PDF Converter Professional 6 is a complete, industry-standard PDF solution built specifically for the business user. Create PDF files

from virtually any PC application – or convert PDF files back into fully-formatted, editable Microsoft® Word, Excel®, PowerPoint®, XPS and Corel® WordPerfect® documents.

A full array of security, annotation and editing tools enable you to edit directly within PDF files and to collaborate with others better and more securely than ever.

Add in cutting-edge features like document assembly, PDF Portfolio creation, scan to PDF and the ability to compare content between PDF and Word files and it's clear – PDF Converter Professional 6 delivers Better PDF for Business™.

CREATE

- Instantly create 100% industry-standard PDF files that are fully compliant with other PDF viewers for reading, sharing and printing.
- Apply security profiles to your PDF documents as they are created. Limit others' ability to copy, print, or modify your content.
- There's no need to waste time opening and printing each individual document to PDF, when you can drag and drop all the files you need into PDF Create once, then create or combine all of the PDF files you need with one click.

CONVERT

- Convert PDF files into fully-formatted Microsoft Word, Excel, PowerPoint, RTF and Corel WordPerfect files for perfect document recreation.
- Eliminate the hassle of trying to edit content trapped in text boxes. Converted documents are complete with flowing text and columns.
- Unique Logical Form Recognition™ (LFR) technology delivers the accuracy needed to convert static PDF forms into editable Microsoft Word documents.

EDIT

- Correct typos, edit and annotate both text and graphics directly within PDF files.
- The FormTyper™ tool lets you convert static PDF forms into fillable PDF forms that you can complete, save and email.
- Document Assembly view lets you combine files, remove, or replace pages. Even update page numbers with a push of a button.

Better PDF for Business™

Create PDF files from virtually any PC application

Instantly create 100% industry-standard PDF files that are fully compliant with other PDF viewers.

Convert PDF files into fully-formatted documents

Convert PDF files into fully-formatted Microsoft Word, Excel, PowerPoint, XPS and Corel WordPerfect documents – complete with text, columns, tables and graphics.

Edit directly within PDF files

Correct typos, edit and annotate both text and graphics directly within PDF files.

Fill and save PDF forms with FormTyper

The FormTyper tool lets you convert static PDF forms into fillable PDF forms that you can complete, save and email.

Scan directly to PDF

Create PDF files directly from your scanner using industry-leading scanning technology.

Create searchable PDF files

The 'auto-detect' feature automatically identifies scanned or 'image-only' PDF files and offers to make the file searchable with just a single click.

Assemble documents

Document Assembly view lets you combine files, remove, or replace pages. Even update page numbers with a push of a button.

Check spelling of entered text

The multilingual spell checker helps you eliminate typos as you fill out forms, enter text into sticky notes, text boxes, or when you use Typewriter. It is easy to add words to the built-in dictionaries and it even offers spelling suggestions.

Split a PDF document by file size

The document-splitting capabilities now give you the option to spit your large document into smaller items by file size you can define. This is a valuable tool to use when submitting large PDF files via email.

Compare documents to find changes

Compare two versions of a document to locate what changes have been done on it. Document comparison of PDF to PDF is extended with the capability to compare a PDF to a Word document.

CREATE ORGANISED AND IMPRESSIVE PDF PORTFOLIOS

Place multiple files, even folders, within a single PDF file. Portfolios allow you to effectively organise, share and secure document groups easier than ever before. Create an informative and appealing collection of related documents by adding descriptions, header graphics, Flash video, background colours and more to your Portfolios.

SECURE AND CONTROL DOCUMENTS

Quickly and easily applying security settings to your documents is as simple as drag and drop. Apply digital signatures, 128- or 256-bit password protection and encryption certificate security, to secure your documents against unwanted usage or modifications.

ARCHIVE YOUR IMPORTANT EMAILS WITH EASE

Archive entire folders of critical emails and attachments with the touch of a button or menu commands directly from Microsoft Outlook® or Lotus Notes®. Your emails will be transformed into searchable PDF files and can be stored together with all related documents on your PC. Keep the email attachments within the archived mail, store them separately in their original format, or easily convert them to PDF files.

COLLABORATE BETTER WITH FLEXIBLE PDF DOCUMENTS

Correct typos, change text and even modify images directly in your PDF files. PDF has never been more flexible. Now you can assemble documents as easily as shuffling paper on your desk and, with all of the familiar commenting tools, plus the ability to migrate comments from one document to another, PDF flexibility undoubtedly leads to better collaboration.

CONVERT ANY AREA OF A PAGE WITH A SINGLE CLICK

Convert a specific area of a document, such as a chart, text or table, to Microsoft Excel, Word, PowerPoint, or Corel WordPerfect – without needing to process the entire page.

System Requirements

- A computer with an Intel® Pentium® or higher processor or equivalent
- Supported operating systems: Windows XP 32-bit Edition with Service Pack 3, Windows Vista 32-bit or 64-bit Editions with Service Pack 1
- Microsoft Internet Explorer 6 or above
- 256 MB of memory (RAM), 512 MB recommended
- 500 MB of free hard disk space for application files plus 150 MB working space during installation
- SVGA monitor with 256 colours, but preferably 16-bit colour (called Medium Colour in XP) and 800 x 600 pixel resolution
- Sound card is optionally required for using the functionality of the supplied Text-To-Speech engine
- Windows-compatible pointing device
- CD-ROM drive for installation
- Web access needed for product registration, activation and obtaining live updates for the program
- To save DOCX, XLSX and PPTX files (for Microsoft Office 2007 Word, Excel and PowerPoint) you should have or install Microsoft .NET Framework 3.0. The Microsoft .NET Framework 3.0 is part of the Windows Vista operating system and does not need to be installed there. The Microsoft .NET Framework 3.0 can be installed on Windows XP.

Note: Performance and speed will be enhanced if your computer's processor, memory and available disk space exceed minimum requirements.

Nuance productivity applications have won over 300 major industry awards.
