DATASHEET

PDF Converter Enterprise 6

Create, Convert, Edit and Share – Better PDF for Business™

PDF Converter Enterprise 6 is a complete, industry-standard PDF solution built specifically for the business user. Create PDF files from virtually any PC application – or convert PDF files back

into fully-formatted, editable Microsoft® Word, Excel®, PowerPoint®, XPS and Corel® WordPerfect® documents.

A full array of security, annotation and editing tools enable you to edit directly within PDF files and to collaborate with others better and more securely than ever.

Add in cutting-edge features like document assembly, PDF Portfolio creation, scan to PDF and the ability to compare content between PDF and Word files and it's clear – PDF Converter Enterprise 6 delivers Better PDF for Business™.

Exclusive Enterprise Features

Only PDF Converter Enterprise 6 offers full redaction capabilities for both text and images, an easy-to-use bates stamping tool with customisable stamp profiles, integration with your critical systems, plus support for network deployment tools* that let you customise your installation.

CREATE

- Instantly create 100% industry-standard PDF files that are fully compliant with other PDF viewers for reading, sharing and printing.

- Apply security profiles to your PDF documents as they are created. Limit others' ability to copy, print, or modify your content.

- There's no need to waste time opening and printing each individual document to PDF, when you can drag and drop all the files you need into PDF Create once, then create or combine all of the PDF files you need with one click.

CONVERT

- Convert PDF files into fully-formatted Microsoft Word, Excel, PowerPoint, RTF and Corel WordPerfect files for perfect document recreation.

- Eliminate the hassle of trying to edit content trapped in text boxes. Converted documents are complete with flowing text and columns.

- Unique Logical Form Recognition™ (LFR) technology delivers the accuracy needed to convert static PDF forms into editable Microsoft Word documents.

EDIT

- Correct typos, edit and annotate both text and graphics directly within PDF files.

- The FormTyper™ tool lets you convert static PDF forms into fillable PDF forms that you can complete, save and email.

- Document Assembly view lets you combine files, remove, or replace pages. Even update page numbers with a push of a button.

Better PDF for Business™

Create PDF files from virtually any PC application

Instantly create 100% industry-standard PDF files that are fully compliant with other PDF viewers.

Convert PDF files into fully-formatted documents

Convert PDF files into fully-formatted Microsoft Word, Excel, PowerPoint, XPS and Corel WordPerfect documents – complete with text, columns, tables and graphics.

Edit directly within PDF files

Correct typos, edit and annotate both text and graphics directly within PDF files.

Fill and save PDF forms with FormTyper

The FormTyper tool lets you convert static PDF forms into fillable PDF forms that you can complete, save and email.

Prepare your PDF files for distribution

Ensure your files are organised for distribution via full redaction capabilities, bates stamping and metadata removal tools.

Scan directly to PDF

Create PDF files directly from your scanner using industry-leading scanning technology.

Create searchable PDF files

The 'auto-detect' feature automatically identifies scanned or 'image-only' PDF files and offers to make the file searchable with just a single click.

Assemble documents

Document Assembly view lets you combine files, remove, or replace pages. Even update page numbers with a push of a button.

Create organised and impressive PDF Portfolios

Place multiple files, even folders, within a single PDF file. Portfolios allow you to effectively organise, share and secure document groups easier than ever before.

Work with any form

The enhanced forms capabilities now let you view, fill out and save dynamic, XML-based forms created with Adobe® Livecycle®.

Transform your files to PDF/A format

Ensure your files will stay accessible for many years to come and easily turn your files into industry-standard PDF/A format for long-term storing and archival.

CONNECTS WITH YOUR CRITICAL SYSTEMS

PDF Converter Enterprise 6 adds integration with Microsoft SharePoint®, as well as offering improved integration with Hummingbird®, Interwoven® and Open Text™ Livelink® Document Management Systems, as well as CaseMap® from LexisNexis®. It has never been easier to open PDF files from your DMS and save back the edited results.

SECURE AND CONTROL DOCUMENTS

Quickly and easily applying security settings to your documents is as simple as drag and drop. Apply digital signatures, 128- or 256-bit password protection and encryption certificate security, to secure your documents against unwanted usage or modifications.

BATCH-PROCESS PDF FILES

The advanced batch processing tool enables you to apply popular commands on a set of PDF files and automatically place them in a selected location. A batch operation can include commands such as adding watermarks, page numbers, stamps, printing files, or migrating PDF comments. Even combine multiple commands to use on the same set of files.

System Requirements

- A computer with an Intel® Pentium® or higher processor or equivalent • Supported operating systems: Windows® XP 32-bit Edition with Service Pack 3, Windows Vista™ 32-bit or 64-bit Editions with Service Pack 1, Windows Server 2003, 2008 with Citrix® or Windows Terminal Services environment* • Microsoft Internet Explorer 6 or above • 256 MB of memory (RAM), 512 MB recommended • 500 MB of free hard disk space for application files plus 150 MB working space during installation • SVGA monitor with 256 colours, but preferably 16-bit colour (called Medium Colour in XP) and 800 x 600 pixel resolution • Sound card is optionally required for using the functionality of the supplied Text-To-Speech engine • Windows-compatible pointing device • CD-ROM drive for installation • Web access needed for product registration, activation and obtaining live updates for the program • To save DOCX, XLSX and PPTX files (for Microsoft Office 2007 Word, Excel and PowerPoint) you should have or install Microsoft .NET Framework 3.0. The Microsoft .NET Framework 3.0 is part of the Windows Vista operating system and does not need to be installed there. The Microsoft .NET Framework 3.0 can be installed on Windows XP.

Note: Performance and speed will be enhanced if your computer's processor, memory and available disk space exceed minimum requirements.
